

KOZA, 770 Lt, 660 Lt, 240 Lt and 120 Lt a container in which standard plastic containers are placed and used is the enclosure. It has a designed model that special for hazardous waste. It allows to organize waste collection areas such as housing yards, parking lots, garden container storages.

Features

Koza 120 Lt

Koza 240 Lt

Koza 770 Lt

Koza 1100 Lt

Five different types compatible with 1100 Lt, 770 Lt, 660 Lt, 240 Lt and 120 Lt standard containers model is available. In addition, double 240 Lt and triple 120 Lt models are also available. KOZA industrial model is produced in special sizes according to the needs of industry in order to offer as a solution.

Rainwater is evacuated by the sloping roof. Thanks to its holes on front and back panels that provides air transfer. Product design, material and paint selection made in accordance with the conditions of outdoor. Front label identifying the type of waste can be customized according to your needs. Simple and perceptible design language avoids confusion.

The top of the product is sliding or nonsliding is preferable.

Its front door can only be used by authorized persons thanks to its keyed lock system.

Product is made of materials that can be %100 recycled. Environmentally friendly, Eco-design product with minimal waste. KOZA design is unique. Designed by industrial product designer Yasemin Artut and Elif Kadayıf for ROKA Design. The design of KOZA products is registered under Turkish Patent and Trademark once.

Features

You can change the floor of the product as without floor, with floor or with floor ramp, according to your preference. The top of the product is sliding or nonsliding is also preferable.

Groundless

There is a 6 cm wide strip shape metal connecting piece parallel bottom of the door on the floor.

Ground

The product has a metal tray on its floor with a grid that allows the liquid to flow to the bottom. The metal that holds the overflowing liquid under this floor. It has a sealed liquid collection pan. There are two metal rails in order to ensure easy movement of wheels which can be removed on 770 Lt and 1100 Lt container. Metal rails can be also removed during collection pan emptying.

Ground Ramp

If the product is selected with a floor, it will be used with a wheeled container. Ramp will allow the container to go to the ground. It is a metal ramp. In different ways of use such as barrels, forklifts. The ramp option is determined by the buyer's needs.

To Create an Order;

1. Determine the liter volume of the product.
2. Determine the floor of the product.
3. Determine the sliding system of the product.
4. Identify the waste labels to be found on the product.
