

Suga takes its name from an evergreen tree which is resistant to difficult weather conditions. Designed for trash and recycle waste type separating and collection, the product also includes a ashtray. Suitable for outdoor use.

Features

Suga is a outdoor waste bin with two compartments (recycling&trash) with an ashtray. It ensures the sorting of recycling wastes from others. There is an ashtray with a grill on the top of the product and under it is a cigarette butt chamber. There are two inner buckets in the product.

The usage of the product is as follows; By rotating the lid at the top of the product, the bags in the inner buckets are easily emptied and new bags are inserted into the inner bucket. The product is cleaned by wiping with a damp cloth.

The upper part of the product is rotated 90 degrees to the right and left to remove the inner buckets.

Inner buckets with a volume of 50 liters each and the ashtray has a volume of 2 Lt.

The ashtray is made of stainless steel. Suga's butt receptacle can rotate and be emptied into the non-recyclable waste bin.

Steel material is used in its design, which can be reused many times. The entire product is suitable for recycling. It is designed in such a way that minimal waste and wastage occur in its production. SUGA design is unique. Designed by industrial product designer Elif Kadayıf for ROKA Design. The design of Suga products is registered under Turkish patent and trademark office.

To create an order;

1. Determine the material.
2. Determine the color.
3. Identify the waste labels to be found on the product.
